ABSTRACT

Information on philanthropic contributions to higher education institutions is presented, based on the Survey of Voluntary Support of Education, 1976-77. Voluntary support excludes income from endowment and other invested funds as well as all support received from federal, state, and local governments and their agencies. Information is provided by type of institution, source of funds, and purpose of funds: data on bequests, deferred giving, and endowment funds are included. Details of support by the 1,006 postsecondary institutions and the 368 private secondary and elementary schools are presented. Results indicated that in 1976-77 the voluntary support received by all higher education institutions increased on a broad front for the second year in a row and attained a new record high of $2.670 billion. The gain over 1975-76 amounted to 10.8 percent, and the increase over 1974-75 was 23.6 percent. As in 1975-76, all groups of donors increased their support in 1976-77, and the gains applied to all the categories of purpose for which support is given. Nearly three-fourths of the overall dollar increase reflects expanded levels of support by individuals and business corporations, and these gains, in turn, appear to have resulted from the continued strengthening of the economy. Although bequests rose slightly, most of the gain in support from individuals was in the form of outright and deferred gifts from living donors. Corporate giving recorded the largest increase (17.7 percent), and there was an important gain in support from nonalumni individuals (13.5 percent). College and university endowment funds rose to a new record high in both book value and market value. (SW)

HIGHER EDUCATION

In 1976-77 the voluntary support received by institutions of higher education increased on a broad front for the second year in a row and attained a new record high. The gain over 1975-76 amounted to 10.8%, and the increase over 1974-75 was 23.6%. As in 1975-76, all groups of donors increased their support in 1976-77, and the gains applied to all the categories of purpose for which support is given. Nearly three-fourths of the overall dollar increase reflect expanded levels of support by individuals and business corporations, and these gains, in turn, appear to have resulted from the continued strengthening of the economy.

Total Support Continues to Rise Sharply. Total voluntary support of all colleges and universities is estimated at $2.670 billion in 1976-77, a new record high, up 10.8% from 1975-76 and 23.6% from 1974-75.

Increased Support Broadly Shared. A sizable majority of the reporting institutions experienced large gains in support in 1976-77. Public colleges and universities reported an increase of 17.1% while the rise for private institutions was 9.6%.

Business Corporations Lead Donor Groups. Although all groups of donors increased their support in 1976-77, corporate giving recorded the largest increase—17.7%—and there was an important gain in support from nonalumni individuals—13.5%.

Broad Gains in Support by Purpose. All of the categories of purpose for which support is given showed increases in 1976-77. Support for capital purposes rose slightly more than support for current operations, but current support continued to account for nearly three-fifths of the total.

Major Increases from Living Donors. Although bequests rose slightly, most of the gain in support from individuals was in the form of outright and deferred gifts from living donors.

Endowments at New High. College and university endowment funds rose to a new record high in both book value and market value.

The number of colleges and universities participating in 1976-77 was 1,006, 1.5% more than in 1975-76. The year-to-year trends and other comparative findings in this report are based primarily on an analysis of data supplied by the 826 institutions that took part in both the 1975-76 and 1976-77 Surveys.

PRIVATE SECONDARY AND ELEMENTARY SCHOOLS

Voluntary support received by independent schools reached an all-time high in 1976-77 of $124.9 million, and a record 368 schools reported. For the 256 schools taking part in both the 1975-76 and 1976-77 Surveys, the year-to-year increase was 13.2%. Most of the increase was the result of a large gain in alumni giving.

PREFACE

The *Survey of Voluntary Support of Education* 1976-77 is the 18th in a series of studies in educational philanthropy dating from 1954-55. The cooperative sponsorship of the recent Surveys by the Council for Financial Aid to Education, the Council for Advancement and Support of Education, and the National Association of Independent Schools has resulted in a single survey that is the only authoritative and detailed source of information on the voluntary financial support of educational institutions.

College and university participation in the 1976-77 Survey was 1.5% above the 1975-76 level. The number of private pre-college schools in the 1976-77 Survey, however, was 8.9% greater than in the 1975-76 Survey. The following table summarizes the entire participation record for 1976-77:

The definitions used in the 1976-77 Survey are the same as those used in 1975-76 and prior years. Voluntary support, as defined in *Gift Reporting Standards*, excludes income from endowment and other invested funds as well as all support received from federal, state, and local governments and their agencies; in editing the survey questionnaires, the CFAE deleted all income from these sources when so identified by the reporting institution. Any enrollment figures not supplied by the colleges and universities were taken from the *Education Directory*, 1976-77, published by the U.S. Department of Health, Education, and Welfare, National Center for Education Statistics.

Since 1965-66, the Survey information has been processed by electronic computer, and most of the data supplied by the participating institutions have been stored on magnetic tape. The ready availability of this store of information makes it possible to undertake supplementary studies of educational philanthropy.

Back issues of the printed reports for the years since 1971-72 are available from the Council for Financial Aid to Education. The reports for all Survey years prior to 1971-72 are now available on microfiche in complete sets, and may be obtained from the Council for Advancement and Support of Education.

The data in these reports are the result of countless hours of work by many individuals. To all those who filled out the questionnaires, to the institutions they represent, and to the cooperating associations in the educational community, CASE, CFAE, and NAIS express their gratitude.

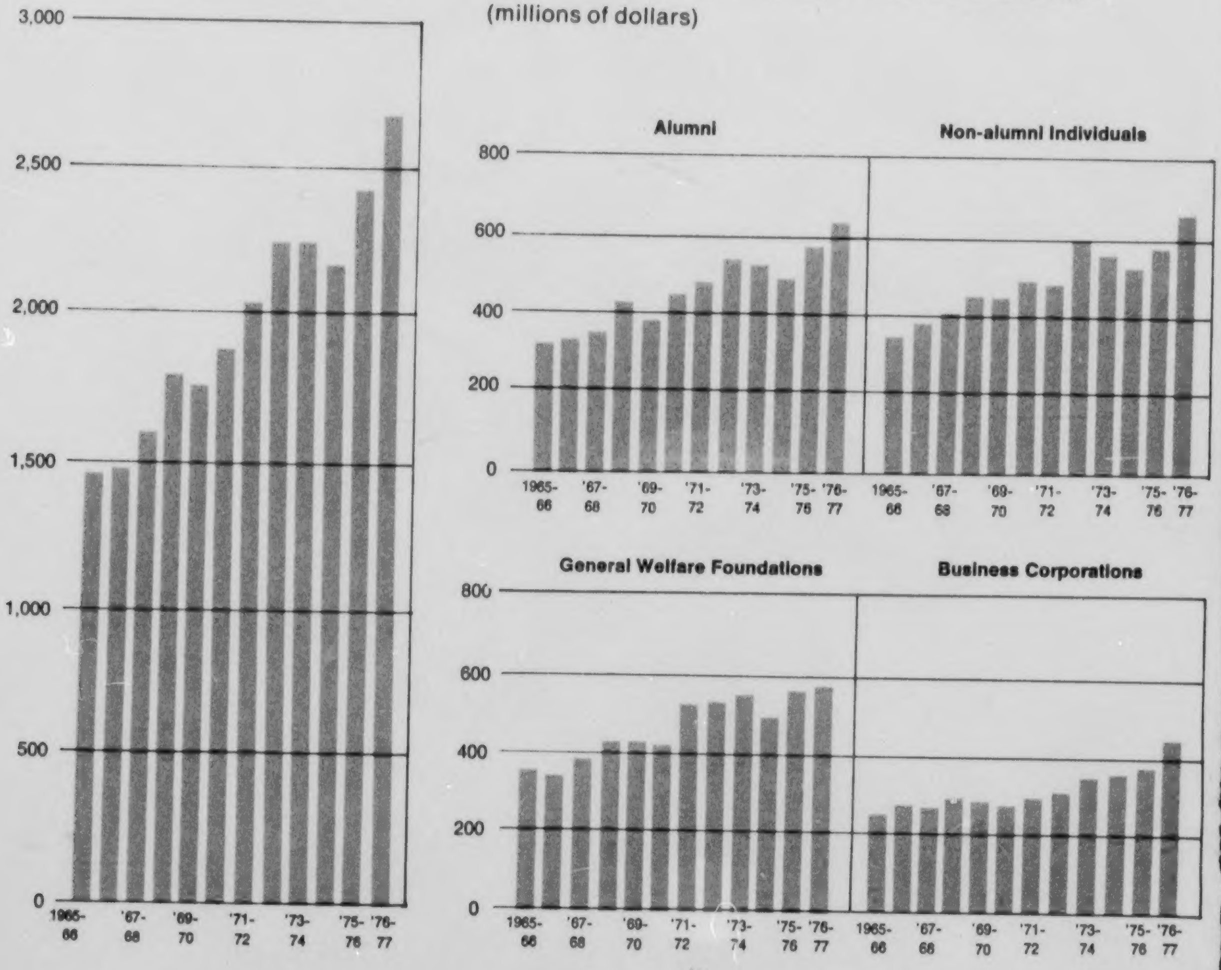
NATIONAL ESTIMATES

In 1976-77 the voluntary support received by institutions of higher education increased on a broad front for the second year in a row and attained a new high estimated at $2.670 billion. The gain over 1975-76 amounted to 10.8%, and, combined with the gain in 1975-76, the two-year increase amounted to 23.6%. As in 1975-76, all groups of donors increased their support, and the gains applied to all categories of purpose for which support was given. Nearly three-fourths of the overall dollar increase reflect expanded levels of support by individuals and business corporations.

Voluntary support of American colleges and universities increased from $2.410 billion in 1975-76 to a record level of $2.670 billion, an increase of 10.8%. These estimates, which are prepared by CFAE, reflect the findings of the Surveys of Voluntary Support of Education and other information.

Estimated Voluntary Support of Colleges and Universities by Major Sources and in Total

(millions of dollars)



The increase of voluntary support of higher education in 1976-77, taken in conjunction with the 11.6% gain in 1975-76, implies a two-year increase of 23.6%. This is the largest rise for any biennium since the early 1960s, and it appears to have been associated primarily with the recovery and expansion of economic activity in the United States since 1974-75.

Gains in 1976-77 were widespread among the various types of institutions. As in 1975-76, increased support was provided by all identifiable classes of donors and for all the broad categories of purpose for which voluntary support is given.

The experience of the several classes of colleges and universities in the Survey is shown in Tables 3a and 3b (pages 7 and 8). As a group, the public institutions reported a much larger increase than the private institutions. While the four-year colleges and universities reported substantial gains, the two-year colleges reported virtually no change in voluntary support.

All the identifiable groups of donors provided increased support to higher education in 1976-77, and all estimated dollar figures represent new record highs. The largest percentage increase was achieved by the business community—corporations and corporate foundations—17.7%. This is the largest gain from this source since the late 1950s. Support received from nonalumni individuals rose 13.5%, and alumni and alumnae increased their giving by 8.5%. Corporations and individuals combined accounted for nearly 75% of the dollar increase in estimated total support. Detailed information on educational support by type of donor appears in Tables 4a and 4b (pages 9 and 10).

For the second year in a row, support for capital purposes, including endowment, increased more rapidly than support for current operations. Capital support continues to account for significantly less than half of total support, however, as it has since 1968-69. The allocation of voluntary support by specific categories of purpose shows a large gain in support designated for physical plant—18.3%; such "bricks and mortar" money has increased by a third since 1974-75. All other categories of designated support and unrestricted giving also increased in 1976-77. See Table 6 (page 60) for data reported in the Survey.

ECONOMIC FACTORS IN VOLUNTARY SUPPORT

The extent of the gain in 1976-77 is welcome news to the academic community, in part because it marks the second year in a row in which private giving increased by more than the rate of inflation. The upsurge of voluntary support since 1974-75 amounts to 23.6% while the rise of the Consumer Price Index (CPI) in the period was only 14%. In terms of real purchasing power, therefore, the two-year advance was nearly 8.5%.

Both the current and constant dollar increases of voluntary support appear to be associated with the expansion of the national economy since 1974-75. The Gross National Product (GNP) rose 22.2% in the two-year period; adjusted for inflation, this increase amounted to 7.9%. All the principal forms of income recorded similar increases, with the result that all of the donor groups experienced an expansion in their capacity to give.

Business corporations, for example, had increases of profits before income taxes that amounted to 27.0% in 1976 and 9.4% in 1977. Total charitable contributions of corporations likewise increased, by perhaps as much as 35% in these two years. While some of this gain was used to increase the reserves of business-sponsored foundations, the total of direct giving by corporations *and* their sponsored foundations to education and other areas of voluntary activity increased by roughly a fourth.

Similarly, the contributions behavior of individuals, alumni and nonalumni alike, is closely related to total personal income before income taxes. Personal income rose 10.3% in 1976 and 11.1% in 1977. Even after an adjustment for inflation, the two-year increase in personal income amounted to 7.5%. Total charitable contributions by individuals (excluding bequests) rose by an estimated 9.8% in 1976 and at least 10% in 1977, and these gains were conducive to large increases in the voluntary support of higher education in the form of outright and deferred gifts from living donors.

Education support by individual donors is affected not only by changes in their incomes but also by changes in the market value of their assets, particularly securities. The recovery of stock-market prices after the end of 1974 led to an expansion of private giving in the form of appreciated securities and other property, at least through the end of academic year 1975-76, and such giving carries a heavy weight in the voluntary support of higher education by individual donors.

On balance, economic factors are likely to have accounted for much of the upsurge in voluntary support in 1976-77 as well as in 1975-76. The continuation of relatively high and rising levels of economic activity suggests that voluntary support is continuing to rise rapidly in dollar terms in the academic year 1977-78. What is unclear is the current impact of inflation; rising prices in 1977-78 may wipe out most or all of the gain in private support while simultaneously causing new pressures on institutional budgets.

VOLUNTARY SUPPORT IN LONG-TERM PERSPECTIVE

Despite the large gains in total voluntary support in 1975-76 and 1976-77, the growth in total voluntary support since 1965-66 has been inadequate in terms of past performance and, more importantly, in terms of the needs of higher education.

The rate of growth since 1965-66 has averaged 5.8% annually, which compares with a rate of 11.9% per year for the preceding 16 years and 6.0% per year for the 40 years prior to 1949-50. There is some evidence that the rate of growth is now accelerating somewhat, as indicated by the data given in Table 2, but the recent gains are too small to make up the shortfall of the late 1960s.

1970-71 to 1976-77	4.4	6.8	6.2	1.7	−4.7	9.0	4.4	−2.2

On the question of need, the picture is clear. Prior to 1965-66, total support averaged about 12% of total college and university expenditures (current plus capital); since 1965-66, voluntary support decreased in relative importance, and in each of the last three years it has averaged less than 6% of total expenditures.

With the exception of inflation, much of the pressure for further expansion of educational expenditures appears likely to abate in the future. Student enrollment appears now to have reached a level from which little if any further increase is likely. Indeed, it is widely anticipated that there will be a modest decline in enrollment during the 1980s. As indicated in Table 2, institutional expenditures per student measured in constant prices have already declined some 13% since 1965-66. This decrease is a reflection of many factors—increased administrative efficiency, a decrease in the number of course and program offerings, cutbacks in research, increased student-faculty ratios, deferred maintenance of physical plant, and similar changes. While fiscal necessity may force further "economies" of this type, it is widely believed that any further significant decline can be achieved only at the expense of the quality of education. Moreover, some of the efforts to economize have either merely postponed important needs that must be made good in future years or shifted the burden. Deferred maintenance, for example, must ultimately lead to deterioration of physical plant. And academic salaries, which have risen less rapidly than the CPI since 1973-74, are falling below parity levels with other sectors of society.

There is, therefore, an urgent need for further encouragement of educational philanthropy. Despite the 23.6% rise in the last two years, total voluntary support has not, since 1970-71, kept pace with inflation. And the impact of inflated prices is likely to be most instrumental in raising the expenditures of educational institutions in the foreseeable future.

THE SURVEY RESULTS

VOLUNTARY SUPPORT, BY TYPE OF INSTITUTION

There was a widespread gain in the dollar value of voluntary support reported by the institutions of higher education for 1976-77. The overall increase for 826 colleges and universities reporting for both 1975-76 and 1976-77 amounted to 11.4%. Public institutions reported an increase of 17.1%; the gain for private colleges and universities was 9.6%.

Voluntary support aggregated $2.132 billion for the 1,006 colleges and universities taking part in the 1976-77 Survey. This was a new record high and exceeded the 1975-76 total by $241 million or 12.8%. The number of participating institutions rose from 991 to 1,006, and the average amount of voluntary support reported per institution increased 11.1%. Summary Table I on pages 64-65 shows the basic data reported in the 1976-77 Survey. A comparison of the amounts reported for both 1975-76 and 1976-77, by type of institution, is shown in Table 3a, below.

* *Figures shown differ slightly from those published in the 1975-76 Survey Report; 7 institutions have been reclassified and the amount of support reported by them in 1975-76 has been allocated to the class in which they reported in 1976-77.*

A somewhat more valid comparison of the 1975-76 and 1976-77 results is provided by the experience of 826 institutions that participated in both Surveys. Detailed data regarding the changes in support received by these institutions, with a breakdown by source, are shown in Summary Table II, page 66. A direct comparison of the totals is given in Table 3b.

For the 826 colleges and universities, total voluntary support increased 11.4% in 1976-77 over 1975-76. Except for the 44 private professional and specialized schools, which reported a decline of 17.1%, and the two-year colleges, which reported virtually no change, the gains were widespread and substantial. Among the 172 public institutions, 69.8% reported year-to-year gains, and the dollar total increased 17.1%. For the 595 private colleges and universities, 60.5% reported increased support, and their total support in 1976-77 represents a rise of 9.6% over 1975-76.

The largest percentage increase was reported by the private coeducational colleges; the 401 institutions in this category received 17.9% more support in 1976-77 than in 1975-76. Most of this increase was due to higher levels of support from individual donors. Support from nonalumni individuals increased 33.2%, while 22.3% more support was received from the institutions' alumni. All other sources of support also increased; business support was up 12.2%, support from religious denominations was up 6.5%, foundation support advanced 3.3%, and there was a gain of 8.0% in support received from other sources.

TOTAL SUPPORT THIS GROUP AS % OF ALL INSTITUTIONS REPORTING		95.2	94.0	

The support reported by public colleges and universities increased 17.1% in total and was derived from increased levels of giving by all donor groups. The alumni of these institutions raised their support by 35.4%, and a 32.4% gain in support was received from business corporations. Foundation support was up 8.0%, and there was an increase of 23.9% in support attributed to other sources.

The major private universities, which accounted for nearly 40% of the voluntary support received by all institutions in this sample, reported an increase of 8.5% in their overall total. Most of this gain was due to support from nonalumni individuals, which was up 18.1%.

For the private men's colleges, voluntary support was up 5.3% in total as a result of increased support from nonalumni individuals, religious denominations, corporations, and "other" sources. These institutions reported a decline in support from alumni and from foundations. The private women's colleges received 3.2% more support in 1976-77 than in 1975-76. Support received from nonalumni individuals fell by a third and offset most of the gains in support received from all other sources.

The private professional and specialized schools as a group had reported very large gains in alumni and foundation support in 1975-76; in 1976-77 they reported very large decreases in support from these sources and a net decrease of 17.1% in their overall total.

Among all the 1,006 institutions participating in the 1976-77 Survey, the 20 colleges and universities reporting the highest totals of voluntary support were:

VOLUNTARY SUPPORT, BY SOURCE

Increases in voluntary support to higher education in 1976-77 were reported for all donor groups. Corporate support of colleges and universities increased by more than that from any other identifiable source, but there was also a substantial gain in support from nonalumni individuals. Alumni support, though gaining only moderately, remained the largest single source of voluntary support.

About three-fourths of the overall dollar increase was accounted for by individuals and business corporations. The broad comparison between 1975-76 and 1976-77 for all reporting institutions is given in Table 4a, and further details by type of institution are shown in Summary Table I (pages 64 and 65).

Although the increase in voluntary support received from individuals was somewhat smaller for 1976-77 over 1975-76 than for 1975-76 over 1974-75, the slowdown was due entirely to a very small rise in bequests (see page 62). Deferred giving showed a 22.2% rise in 1976-77 versus a 7.0% decline in 1975-76, and other gifts by living donors advanced 17.4% in 1976-77 as compared to 13.9% in 1975-76.

The most significant development in the 1976-77 Survey is the large and widespread rise of corporate support of colleges and universities. For all institutions reporting, the dollar total increased nearly 20%, and for the 826 institutions taking part in both the 1975-76 and 1976-77 Surveys the year-to-year increase amounted to 17.2% (Table 4b). Corporate support of public colleges and universities increased 32.4% (see Summary Table II, page 66), while the gain for private institutions amounted to 9.3%. As a consequence, corporate support of public institutions rose to a record level of nearly 39% of total corporate giving to all four-year colleges and universities. Business support rose 12.2% for the private coeducational colleges, and 19.5% and 10.7% for the private men's and private women's colleges, respectively. The private professional and specialized schools reported 9.7% more business support, and the major private universities received 7.5% more support from this source. Corporate support of two-year colleges increased by 13.6%.

TOTAL SUPPORT THIS GROUP AS % OF ALL INSTITUTIONS REPORTING		95.2		94.0	

Educational support received from business corporations through employee matching gift programs continued to increase dramatically in 1976-77. There was a 14.7% increase in the number of gifts matched and a 0.7% increase in the size of the average match per gift, resulting in a 15.5% increase in corporate support supplied through this mechanism. At $16.3 million, corporate matching gifts accounted for 4.6% of total corporate support reported by the institutions in the 1976-77 Survey, which compares with 4.7% for those in the 1975-76 Survey.

Voluntary support received from nonalumni individuals increased 14.1% in 1976-77, but the picture varied widely among the various classes of colleges. There were very substantial gains for the major private universities, private men's colleges, coeducational colleges, and public institutions. All other groups of colleges received less support from such donors in 1976-77 than 1975-76.

Similarly, there were wide variations in the changes in the level of support from institutional alumni. There was a 9.5% year-to-year gain overall, but the public institutions reported an increase of 35.4%, the private coeducational colleges received 22.3% more, and the private women's colleges reported a gain of

Technical Notes:

A. In the listing on the following pages, Column 22 does not purport to show the total operating expenditures of the reporting institutions; it excludes the operating costs of dormitories, dining halls, student stores, and other "auxiliary enterprises" as well as all outlays of a capital nature.

B. In some instances the number of institutions listed is greater than the number tabulated, for three reasons: (1) some multicampus institutions are shown in summary as well as in detail, (2) some of the component professional schools of major institutions are also listed separately, and (3) a few of the institutions not supplying complete information or reporting too late for computer tabulation are listed.

C. There were 53 institutions responding to the Survey invitation which are omitted from the tabulated data. These institutions include those which (1) were unable to supply any information, (2) received no support, (3) were unable to supply complete information, or (4) reported too late for computer tabulation. These institutions are listed separately on page 58.

17.1%. Alumni support of two-year colleges rose 12.9%, the first gain from this source in four years. The major private universities, private men's colleges, and the professional and specialized schools all reported decreased alumni support.

* Excludes independent schools; see page 63 for annual fund information pertaining to these institutions.

** It should be noted that the 1968-69 figure for total alumni giving includes one nonrecurring gift of $40 million.

Just as the exclusion of bequests reveals an increase in gifts by all individual living donors that was larger than the increase of overall support from individuals, so also do the Survey data show that the increase in current gifts from alumni was larger than the increase in overall alumni support. This is indicated in Table 5, which shows the annual fund experience for all participating colleges and universities. In 1976-77 there was an increase of 5.2% in the number of alumni gifts to annual funds and a gain of 7.7% in the size of the average gift. The result was a rise of 13.3% in the dollar amount of annual fund gifts from alumni. There was virtually no change in the number of alumni donors to annual funds as a percentage of the number of alumni solicited; at 17.5%, this "effectiveness rate" has been relatively constant for several years.

Except for the two-year institutions, all classes of colleges and universities reported a rise in support from church sources, and the overall increase amounted to 9.5%. Among the major recipients the private men's colleges reported an 88.3% gain and the professional and specialized schools (which includes several theological seminaries) reported an increase of 32.4%. The private coeducational colleges, which account for two-thirds of all support received from religious denominations, reported an increase of 6.5% in 1976-77.

Support received from private foundations increased only 2.2% in 1976-77 and as a percentage of total voluntary support fell to 20.9%, the lowest level on record. Foundation support of private men's colleges and professional and specialized schools dropped substantially, offsetting a good part of the gains reported by other classes of institutions.

VOLUNTARY SUPPORT, BY PURPOSE

All of the categories of purpose for which voluntary support is given showed increases in 1976-77. Support for capital purposes rose slightly more than support for current operations, but current support continued to account for nearly three-fifths of the total.

The distribution of voluntary support by purpose, as reported by all the colleges and universities participating in the Survey in 1976-77, is shown in Table 6, together with similar data from the 1975-76 Survey. Of the $241 million increase in the total amount of reported support, $115 million, or 47.7% was designated or allocated for capital purposes, for an increase of 14.8% over 1975-76. Current operating support rose 11.3% and continued to account for nearly three-fifths of the total.

The relatively greater gain of support for capital purposes is attributable to the major private universities, the private coeducational colleges, and the public institutions. The gain in capital support received was 32.1% for the private coeducational colleges, 31.8% for public institutions, and 11.7% for major private universities. The private men's and women's colleges and the professional and specialized schools reported substantially less support for capital purposes in 1976-77 than in 1975-76.

Table 7 indicates the relative importance of support for current and capital purposes, by type of institution and by source, for each of the last three years. Support for capital purposes in 1974-75 was at an all-time low as a percentage of total voluntary support, and the relatively large gains in 1975-76 and 1976-77 have not raised this percentage to the levels that prevailed before 1974-75.

Traditionally support for capital purposes, including endowment, accounts for more than half of total voluntary support for the private colleges and universities. In recent years, however, it has dropped below 50% in relative importance except for one or two groups of institutions in one or two years. The private men's colleges, for example, reported more than half their total support for capital purposes in both 1975-76 and 1976-77, but this was an exception.

The public institutions, on the other hand, have perennially received much less for capital purposes than for current operations. In the past three years, for example, support for capital purposes has fluctuated around the 25% level relative to their total voluntary support. For the two-year colleges, capital gifts have averaged about one-third of their total support in recent years.

In recent years, about two-thirds of capital gifts have been provided by individual donors, both alumni and nonalumni, and a disproportionate part of the increase in support for capital purposes in 1976-77 came from these sources. The historical patterns were otherwise unchanged in 1976-77; private foundations, business corporations, religious denominations, and the "other" sources of support have favored current operating support over capital gifts by wide margins, and in 1976-77 three-fourths of the dollar increase in total support from these sources were earmarked for current purposes.

Support for the construction, maintenance, and/or operation of physical plant increased 18.3% in 1976-77, more than any other listed category, and it now constitutes about one-sixth of the total. Research support increased 14.7%, primarily because of more support for this purpose from foundations, corporations, and "other" sources. Unrestricted support rose 11.3% and continued to account for about one-third of total support received for all purposes. Support designated for student aid and for faculty compensation rose 5.8% and 7.4% respectively; both categories had increased very significantly in 1975-76, primarily due to gifts designated for these purposes from individuals, and such gifts were almost constant in 1976-77.

BEQUESTS, DEFERRED GIVING, AND ENDOWMENT FUNDS

Although there was a small increase in the dollar value of bequests in 1976-77, this form of voluntary support declined in relative importance. Deferred gifts rose 22.2% in dollar amount and increased as a percentage of total support. The reported values of college and university endowment funds reached new record highs.

The value of bequests reported by colleges and universities amounted to $284.2 million in 1976-77. As shown in Table 4a, page 9, this represents an increase of 1.7% over 1975-76 and a decrease from 30.8% of total support received from individual donors in 1975-76 to 27.7% in 1976-77. Both of these percentages are well within the range of prior experience, as indicated in Table 8.

Deferred gifts increased 22.2% from a reported figure of $56.9 million in 1975-76 to $69.6 million in 1976-77. At 6.8% of voluntary support from individual donors, this form of giving represents about the same share of individual support as it has on average over the past decade.

The endowment funds of the colleges and universities reporting this information reached $12.8 billion in book value and $14.4 billion in market value at the end of 1976-77. Both these totals are new record highs, roughly 7% above the levels one year earlier.

Private Secondary and Elementary Schools

THE SURVEY RESULTS

Voluntary support reported by independent schools reached an all-time high in 1976-77 with a total of $124.9 million. For the 256 schools taking part in both the 1975-76 and 1976-77 Surveys, the year-to-year increase was 13.2%. Most of the rise of total support was the result of a large gain in alumni giving.

A total of $124.9 million in voluntary support was reported by 368 schools in the 1976-77 Survey, an increase of 11.1% over the $112.4 million reported by 338 schools for 1975-76. Both the dollar total and the number of schools reporting were new record highs, and the average amount of support per school reporting, $339,473, was the second highest on record, exceeded only by the 1972-73 figure of $359,358, which included the effect of one exceptionally large gift to one school.

There were 256 schools that participated in both the 1975-76 and 1976-77 Surveys, and this group reported a year-to-year gain of 13.2% in total support. About 80% of the dollar increase was the result of a 28.8% gain in alumni support. There were also large increases in support received from business corporations (+23.3%) and nonalumni individuals (+8.6%). For all schools reporting, total support from nonalumni individuals accounted for 37.8% of support received from all sources and was the largest single source of support.

Alumni support received through annual funds recorded an increase from $13.5 million in 1975-76 to $15.1 million in 1976-77, a year-to-year rise of 12.3%. There was a 3.7% gain in the number of alumni donors and an increase of 8.4% in the size of the average alumni gift to $88.58. Some 23% of the schools' alumni contributed to annual funds in 1976-77 and 1975-76.

The ten schools reporting the largest support totals in 1976-77 were:

EMMA WILLARD SCHOOL (N.Y.)	4,872,249	LAWRENCEVILLE SCHOOL (N.J.)	2,595,908
ST. PAUL'S SCHOOL (N.H.)	2,933,646	CHOATE ROSEMARY HALL (CONN.)	1,933,850
PHILLIPS ACADEMY-ANDOVER (MASS.)	2,925,988	PHILLIPS EXETER ACADEMY (N.H.)	1,656,230
DEERFIELD ACADEMY (MASS.)	2,779,877	BLAKE SCHOOL (MINN.)	1,559,560
HOTCHKISS SCHOOL (CONN.)	2,719,284	KINKAID SCHOOL (TEX.)	1,527,720

The data reported by all 368 schools show total support received from individual donors in 1976-77 at a level 16.2% above the amount reported by 338 schools in 1975-76; however, there was a decrease of 13.4% in the dollar value of bequests and an increase of 15.5% in deferred giving, which implies a year-to-year increase of 20.1% in outright gifts from living donors.

Note: The year-to-year changes shown in this table are not all of equal significance. The total amount reported by any one class of institution from any one class of donor is subject to erratic behavior due to major fund-raising drives, the timing of corporate and foundation programs, large bequests and other non-recurring influences. This is particularly true of the smaller groups of institutions and the smaller dollar figures.

* In every Survey, each institution is classified in the category appropriate to its status in that year. Since the status of many institutions has changed over the years, the data by category is not strictly comparable from one Survey to another. See Page 7 for a comparison of 1975-76 and 1976-77 data on an adjusted basis.
